Introducing the Implementation Resource Navigator!

The *Implementation Resource Navigator* is a curated, guided website that organizes web-based implementation research resources by topic and easy-to-use links. This site will support researchers (from beginning to expert implementation scientist), research mentors, and educators to navigate a proliferation of frameworks, measures, tools, and educational materials.

Topics include:

- General introductions to the field of implementation research

- Web-based resources on implementation frameworks, models and strategies

- Resources on evaluating barriers and facilitators, adaptation and fidelity, equity, sustainability, de-implementation, and hybrid effectiveness-implementation designs

To access the Navigator, visit: www.implementation-guide.com

This tool was developed by The Mongan Institute at Massachusetts General Hospital in partnership with the Implementation Science Center for Cancer Control Equity.
